Throughout the year the schools have been well organized, the instruction efficient, results in school work in respective grades were normal, the attitude of pupils toward their work, their teachers and school was co-operative and wholesome.

PROMOTIONS

The following numbers of promotions in respective grades were made in June:

Grades,	I	II	III	IV	V	VI	VII	VIII

School visits during the year 21; treatments 10; Home visits

Home visits were made to investigate illness and for instruction in the isolation and treatment of communicable diseases.

Visits were made to the school officials pertaining to the health work. Cod Liver Oil was distributed to pupils where the need of it was apparent.

A selected group of pupils were taken to the chest clinic for examination by Dr. Kerr. Where trouble was found, followed up home visits were made to instruct the parents in caring for the children.

The healthier appearance of many of the pupils, also fewer absences due to illness, is apparent as a result of the Cod Liver Oil, milk and correction of defects, under The Child Health Recovery Program.

Whenever possible each child should drink a quart of milk daily. It is needed to supply calcium for the growth of bone and teeth.

The presence in the mouth of decayed and abscessed teeth, both temporary and permanent, increases the susceptibility to communicable diseases and undoubtedly helps to infect tonsils, cause enlarged glands, digestive disorders and other troubles.

The first teeth must be watched carefully and kept clean. When the baby has two or three teeth, a little cotton on a tooth-pick or a small soft brush should be used to remove particles of food from between and around them. If through carelessness or oversight a cavity appears it should be filled immediately. Many children who come to the clinics have previously lost or have to have extracted from one to all four of the so-called "six year molars," which parents do not trouble about, thinking them temporary teeth.

Proper nutrition, daily cleansing of the teeth, having cavities filled as soon as they appear, would eliminate much of the dental work now being done to save the teeth, and undoubtedly improve the condition and the appearance of the permanent teeth as well as save the parents a great deal of expense.

I thank the school officials, teachers, parents and pupils for their interest and help in the health work.

MARGARET E. HARRIS, R. N.
